

The Moraira/Teulada U3a Friends of Avinenca are visiting the FONT ROJA Natural Park near Alcoi on Monday 9<sup>th</sup> December.

We will be finding out how the park authorities are using various methods to re-generate the areas devastated by forest fires. In particular how they encourage the natural regenerative processes by increasing the bee populations. We will see the various types of hives used and learn about the potentially catastrophic effects that may befall the bees, and thereby our, lives.

Additionally we will be visiting the excellent interpretation centre and will have time for a gentle stroll through the autumn forest areas in which are to be found flocks of long tailed tits as well as many other species.

If you would like to take part in this trip and are already a member, or if you would like to join, (membership is free), please go to [www.avinenca.es](http://www.avinenca.es) for further details.
